

## **No Smoking/Vaping Policy**

Second hand smoke is dangerous, particularly for children and can lead to an increased risk of breathing problems, asthma and allergies.

In accordance with the Early Years Foundation Stage we have a No Smoking/Vaping Policy within the setting's indoor or outside play areas, or anywhere inside the church building.

We ask staff, parents/carers/visitors to the setting to not smoke/vape in the carpark area where children are dropped off and collected.

We will not take the children in our care into smoky environments and will avoid places whereby smoking is permitted.

None of the staff smoke/vape, if staff were to smoke or vape, they would be asked to do so when they are not insight of the Preschool/carpark area and they would need to ensure they were not in work clothes.

Should the subject arise we will educate the children on the risks of smoking to their health.
