

No Smoking Policy

Second hand smoke is dangerous, particularly for children and can lead to an increased risk of breathing problems, asthma and allergies.

In accordance with the Early Years Foundation Stage we have a no Smoking policy within the setting's indoor or outside play areas.

Similarly we will not take the children in our care into smoky environments and will avoid places whereby smoking is permitted.

None of the staff smoke and visitors to the setting are also asked to refrain from smoking.

Should the subject arise we will educate the children on the risks of smoking to their health.
